

ABSTRACT

Cosmetic composition containing electric carriers

The present invention relates to a cosmetic composition which contains electric carriers apart from specific active agents and auxiliaries. According to the present invention, the composition contains 0.1 to 10% by weight of a cosmetically acceptable, solid electret material with a particle size of 0.05 to 100 μm , which electret material is to be brought in the electrete state and has an induced permanent dipole moment and a permanent electric field with a field strength of 500 to 10^7 Vm^{-1} , as well as cosmetic carrier substances, auxiliaries, further active agents or a mixture thereof in an amount ranging up to 100% by weight.
